

## BIFIBRESOM3

### OS2 optical fiber optic dual cable LSZH sheath

## DESCRIPTION

This OM3 optical cable is typically used for short distances: patch cords. OM3 multimode optical fiber meets and exceeds IEC\*, ITU, and EIA/TIA specifications. The strands are natural-colored. Aramid fibers are positioned on the tight-buffered strands as strength members. An HFFR jacket is extruded over the strength members. The two simplex elements are assembled under a flexible LSZH jacket.

## ADVANTAGES

- Good mechanical strength.
- Tightly woven cable for connection without fanouts.
